14", Intel Core i5-1335U, 8 GB, 56 GB, CH

HP Tilt Pen MPP 2.0

[Link zu Digitec](#)

**muss zusätzlich gekauft werden*

Pro / Con List: Microsoft / Apple iOS

Microsoft

- Integrates nicely with Office 365
- Every programming development environment runs no problem on Windows
- Keyboard is part of the computer or is included in most cases
- Mouse is easy to attach in case applications require more advanced point-and-click usage
- Integrates nicely with our touch Screen & Chromecast
- Hardware keyboard makes typing a pleasant experience

Apple iOS

- Conversion issues between documents made on Apple devices and other devices
- Compatibility issues with many programming development environments
- Requires a keyboard attachment
- Limited to tapping/dragging for interaction
- Incompatible with Chromecast
- Typing with software keyboard is cumbersome
